

# Making Hot Chocolate

## **Materials:**

- Water
- Packet of hot cocoa mix
- Cup
- Spoon

## **Directions:**

1. First, fill your cup with water, leaving a little room at the top. Do not fill to the brim.
2. Next, heat your cup of water in the microwave for one minute and 30 seconds.
3. Then, tear open the packet of hot cocoa mix and pour it into your cup of water. Make sure to discard your empty packet.
4. Use your spoon to stir the hot cocoa mix into the water until it has dissolved.
5. After stirring, take a very small sip – how is the temperature? If it is too cold, heat it up in the microwave until you can see steam coming off the top. If it is too hot, give it a few minutes to cool down.
6. Finally, enjoy your warm beverage!
