

# MASTER THE WORD LIST

Come up with a list of words that you'd like to master. These words should be ones you use often or are important to you, and they should all contain your sound (*think about school, names, sports/hobbies, actions, etc.*). Then, complete a 'Master the Word' page for each word on your list. Once you have successfully completed each section, return to this word list and check off the 'mastered' box. Do this for each word until you have mastered the entire list.
